Introduction

Field Operations

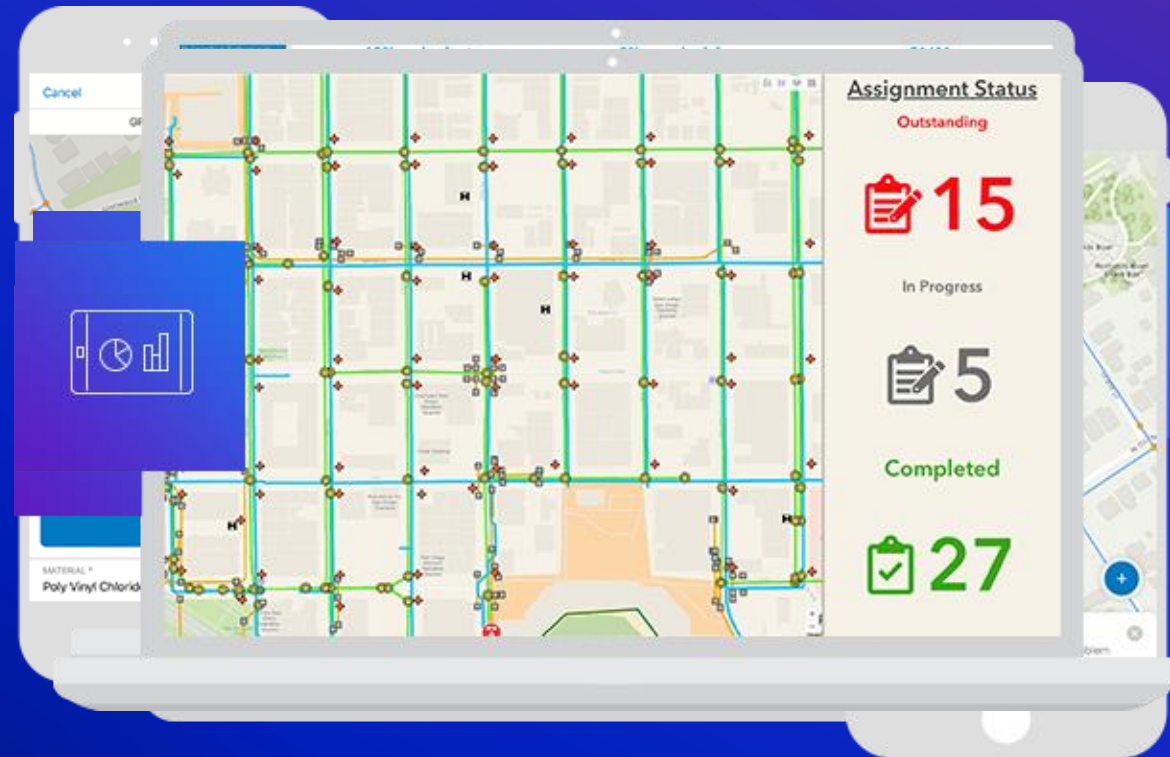

Field Operations | Benefits of modernization

Field Operations | Benefits of modernization

- Efficient and accurate data capture
- Cost effective
- Data management
- Monitor status

Field Operations

Location-enable all phases of field work

Focused Apps

- ArcGIS Workforce
- ArcGIS Explorer
- ArcGIS Navigator
- ArcGIS Collector
- ArcGIS Tracker
- ArcGIS Survey123
- ArcGIS QuickCapture

ArcGIS Field Maps | The all-in-one app for fieldwork

Best in breed **mapping** system

World class **data collection** solution

Revolutionary location **tracking** technology

World class **tasking** and work management*

State of the art **navigation** capabilities*

*Capabilities will be included in future releases

Field Operations | Which app do I choose?

Field Operations | Which app do I choose?

ArcGIS Field Maps

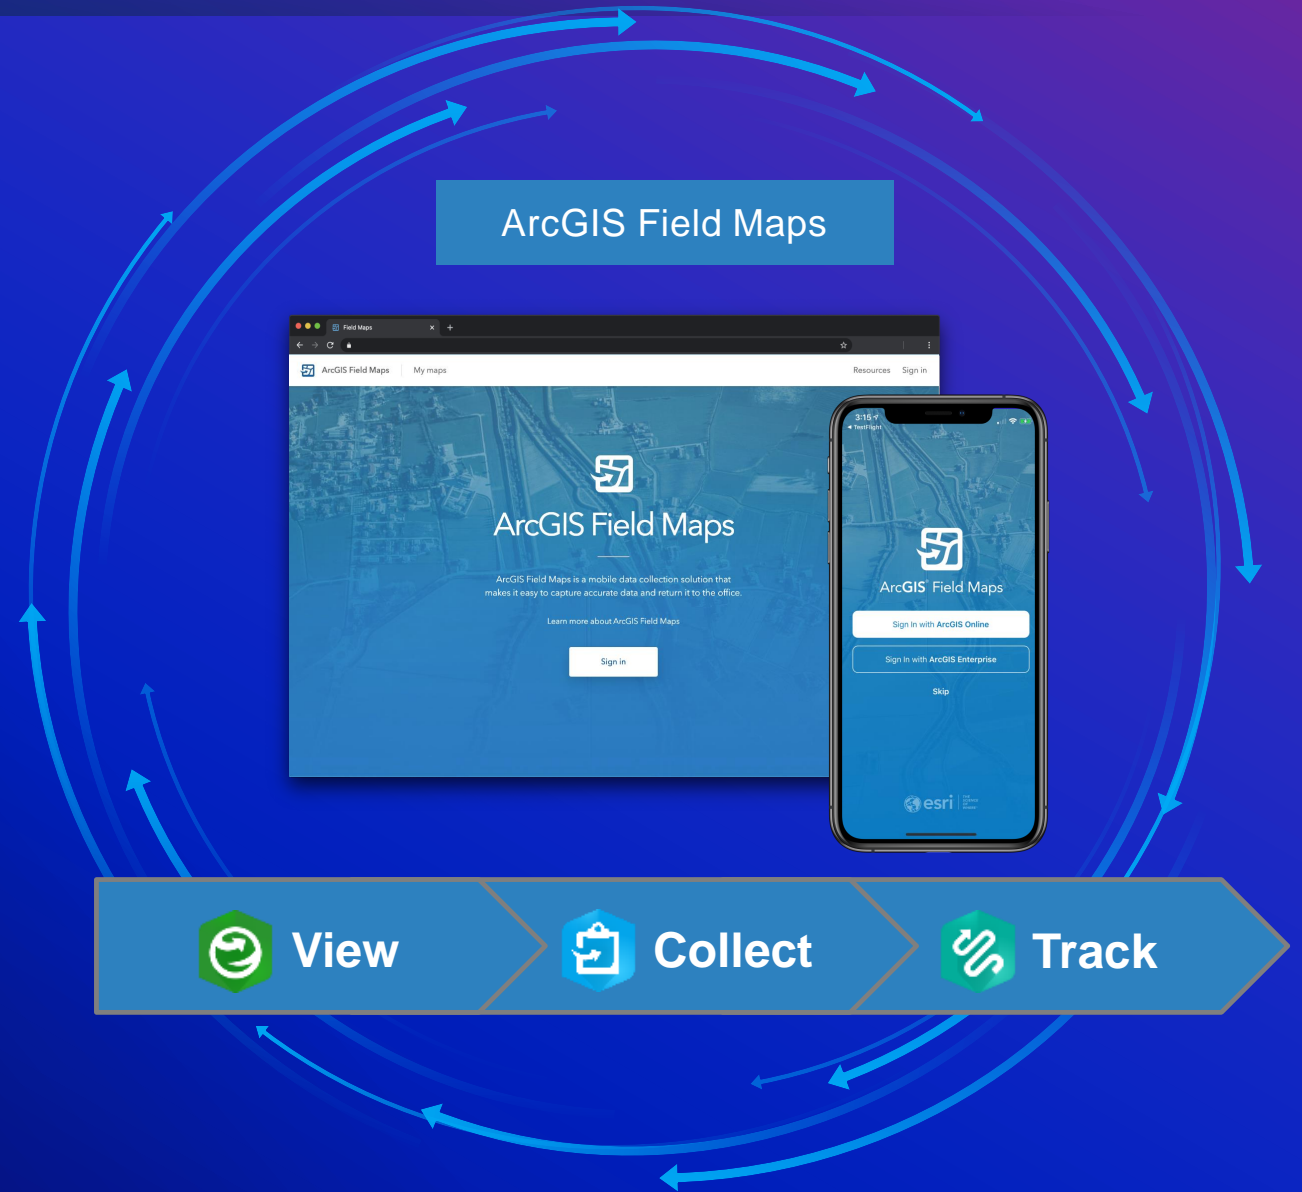

All-in one app for fieldwork

ArcGIS Field Maps | 5 key capabilities in one app

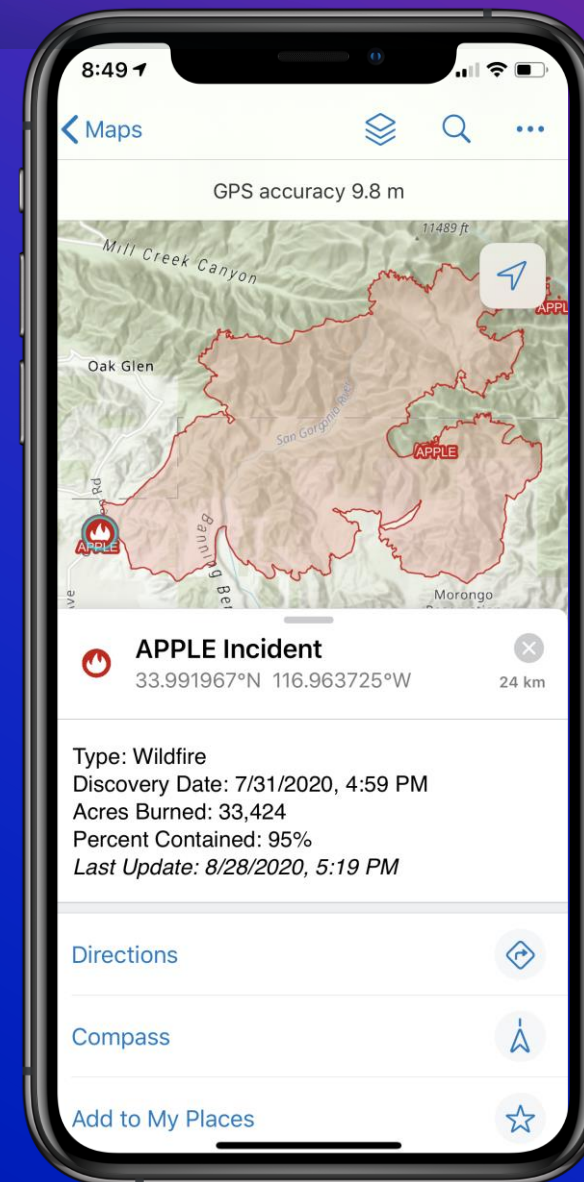

1. Map Viewing
2. Map Markup
3. Data Collection
4. Asset Inspection
5. Location Tracking

Map Support

- Advanced symbology/labeling (w/ Arcade)
- Group layers, annotation
- Pop-ups (w/ Arcade including feature sets)
- Layer refresh for auto-updates

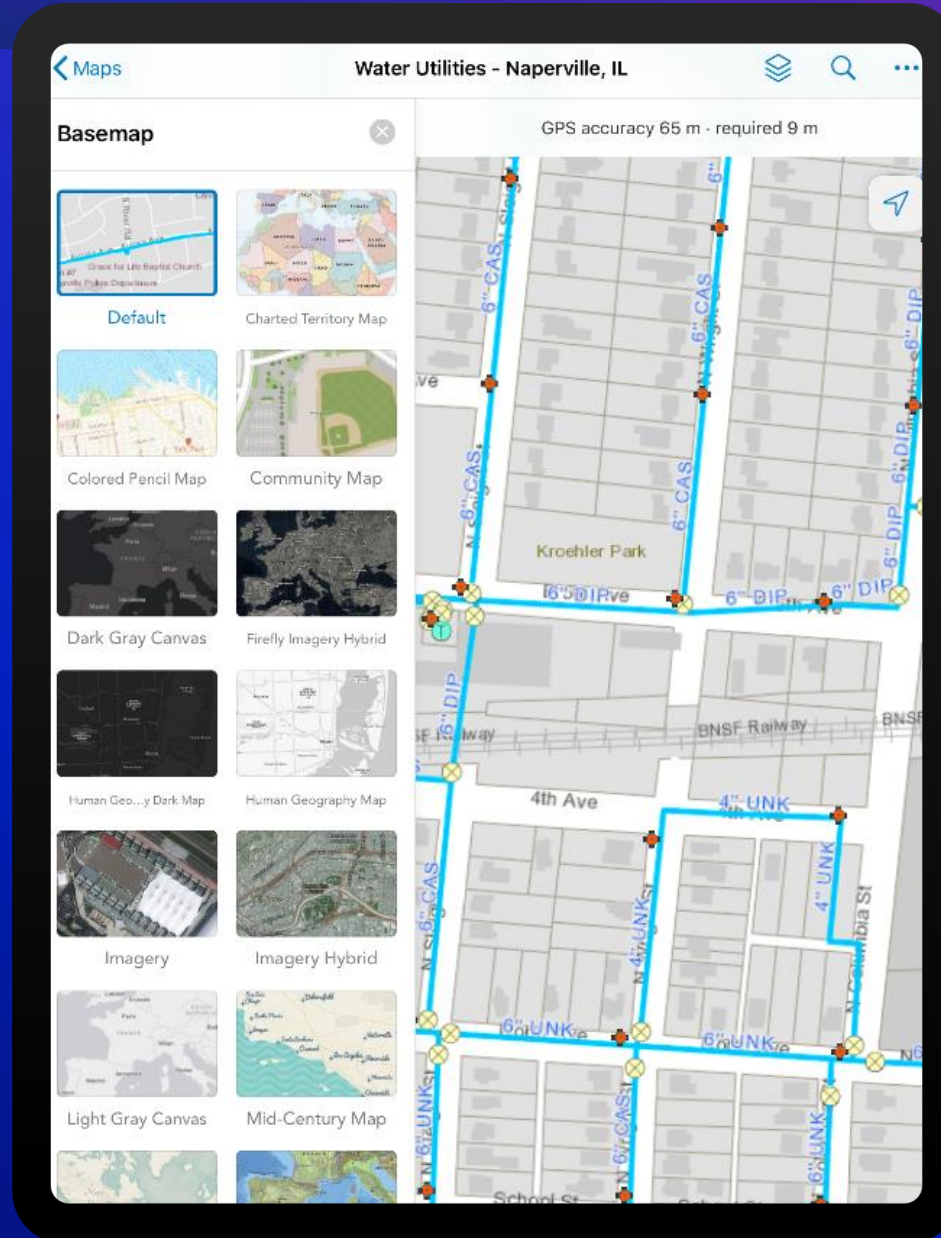

ArcGIS Field Maps | Map Viewing capabilities

Map Tools

- Basemaps

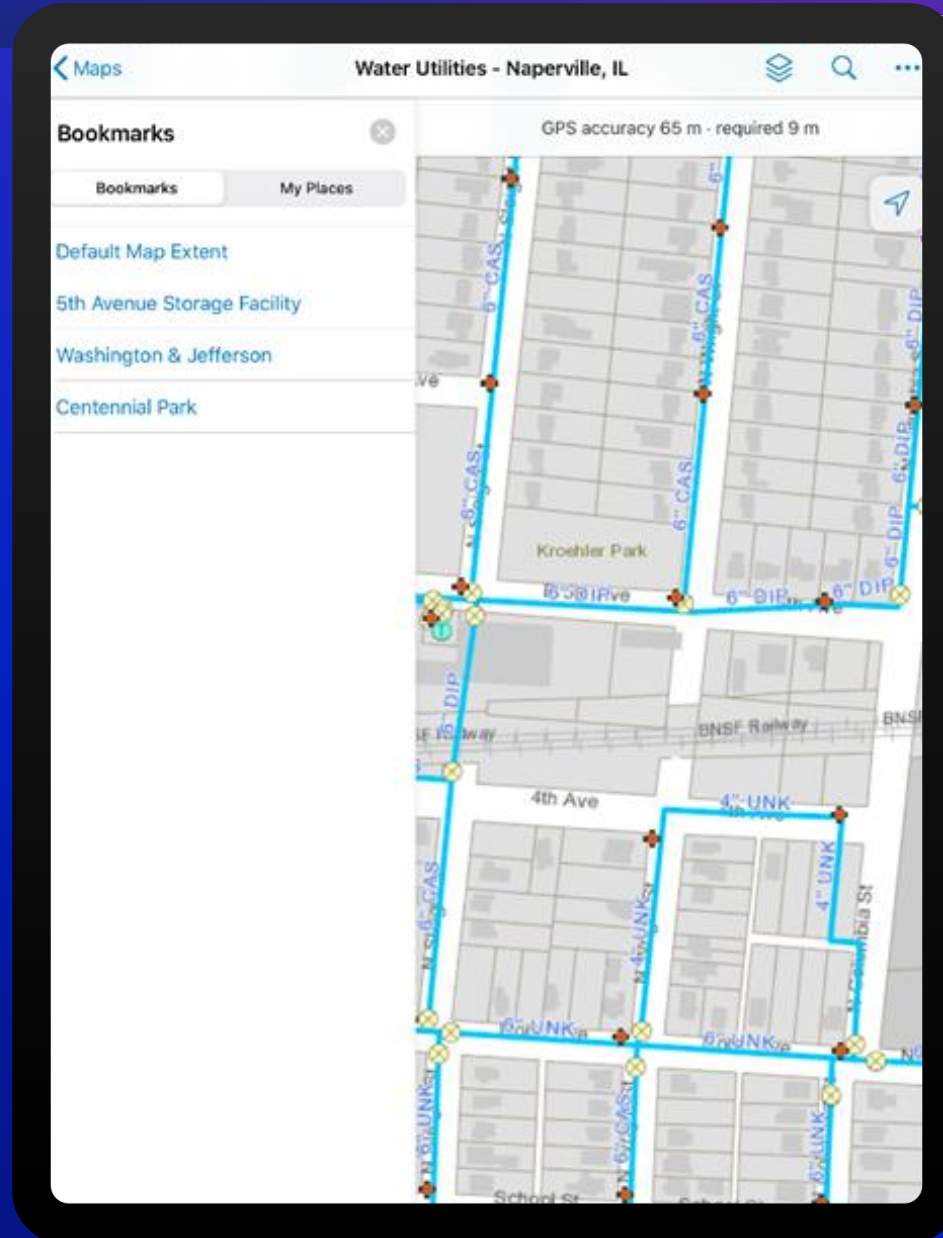

ArcGIS Field Maps | Map Viewing capabilities

Map Tools

- Basemaps
- Bookmarks

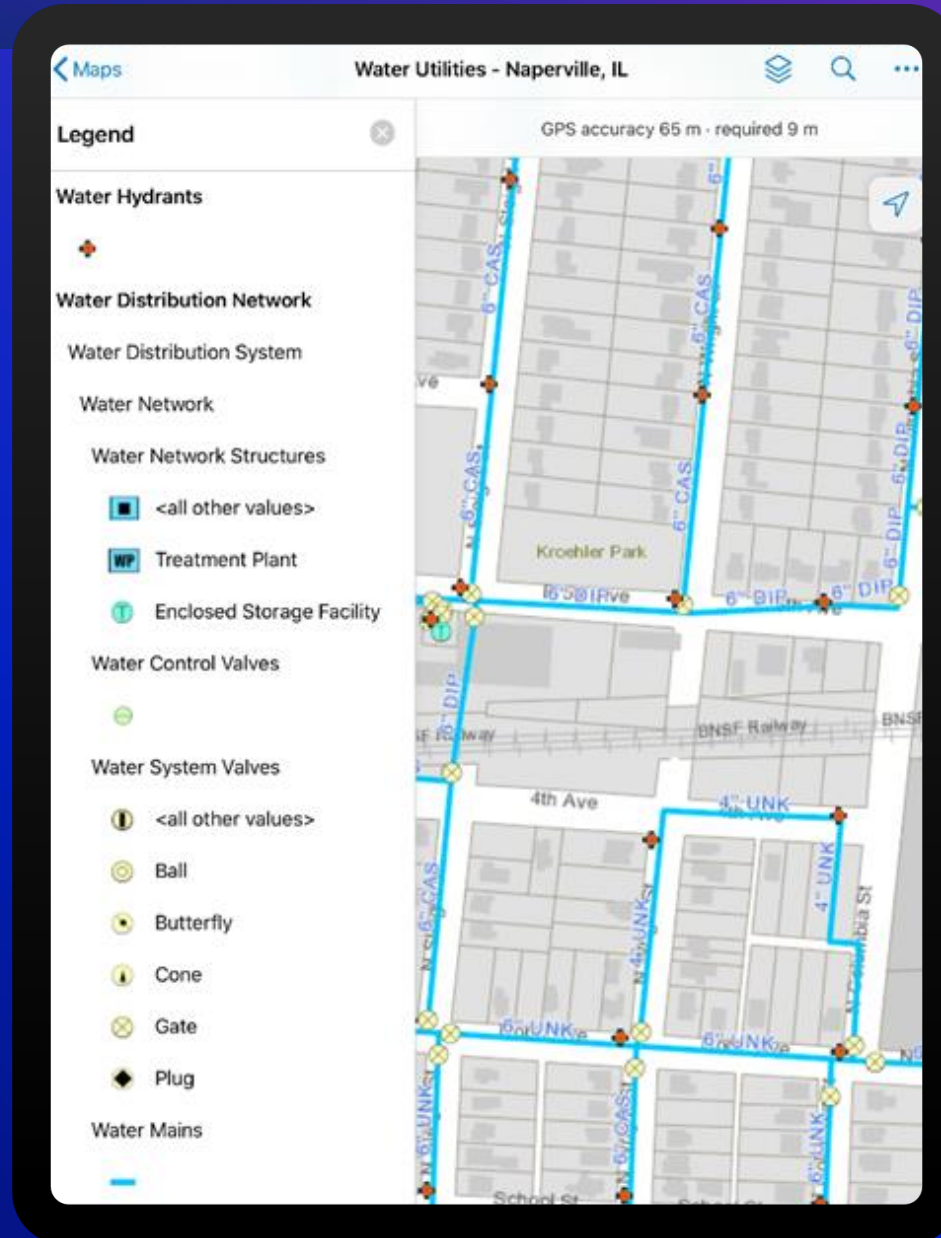

ArcGIS Field Maps | Map Viewing capabilities

Map Tools

- Basemaps
- Bookmarks
- Legend

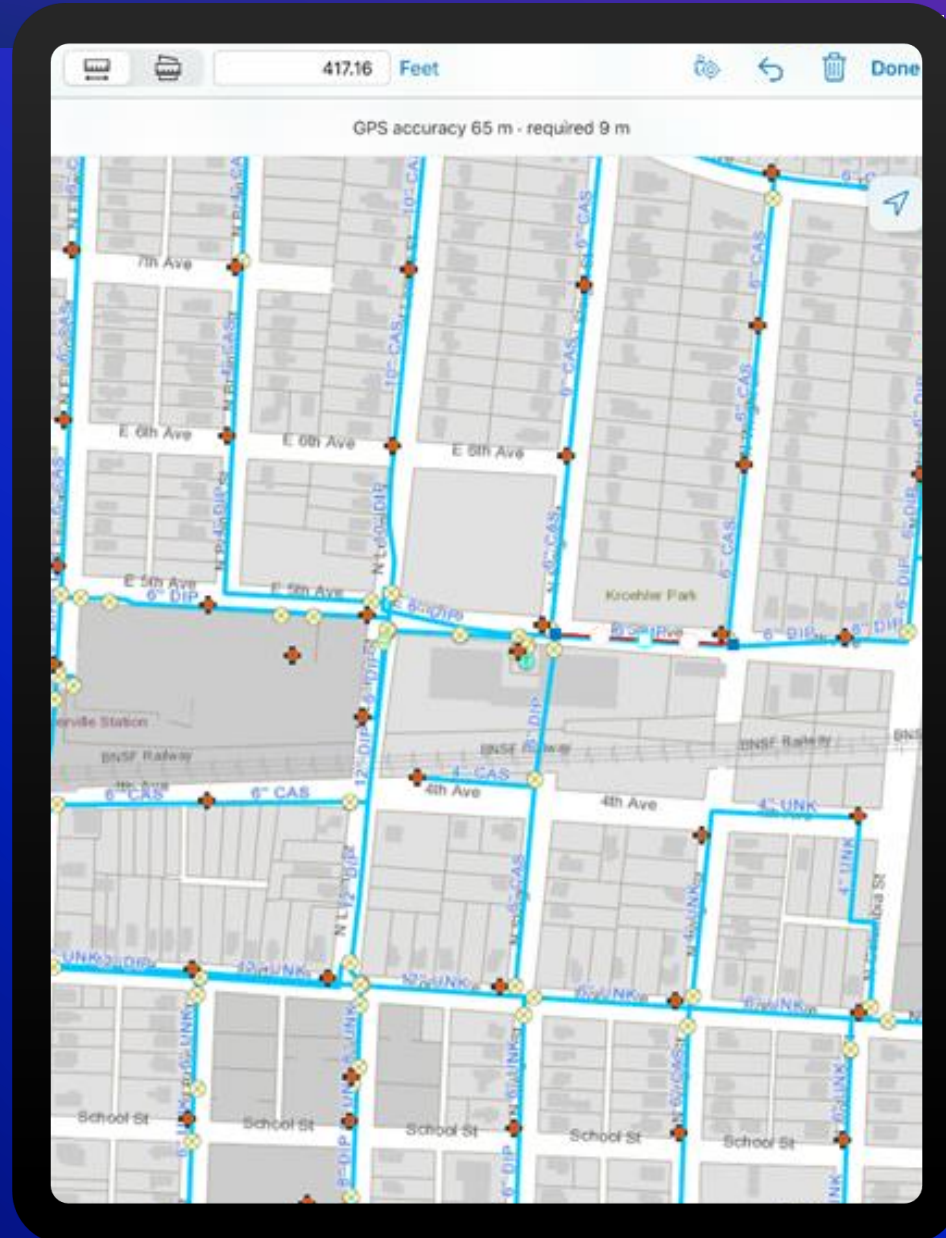

ArcGIS Field Maps | Map Viewing capabilities

Map Tools

- Basemaps
- Bookmarks
- Legend
- Measure (lines, areas)

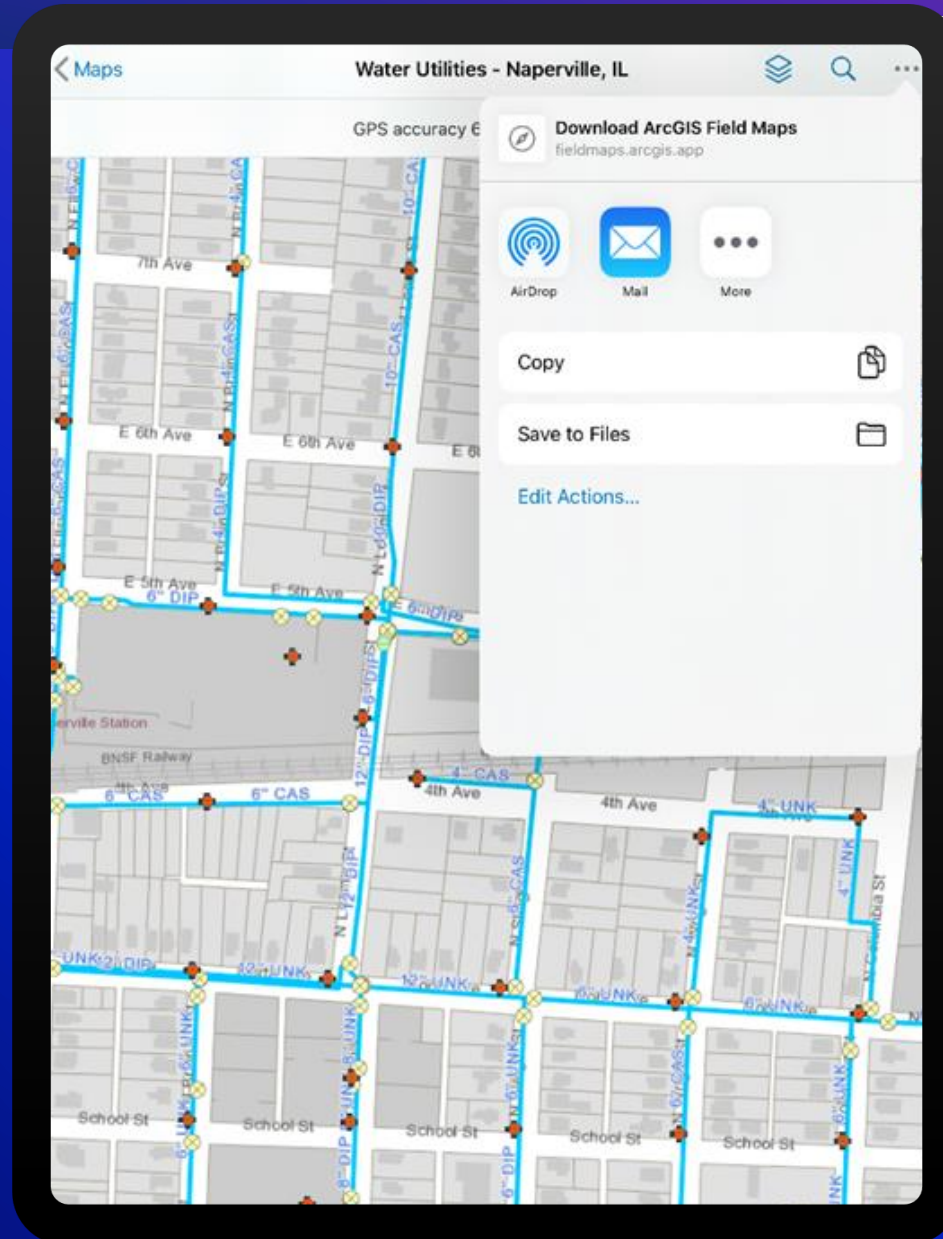

ArcGIS Field Maps | Map Viewing capabilities

Map Tools

- Basemaps

- Measure (lines, areas)
- Share Map

Map Tools

- Basemaps
- Bookmarks
- Legend
- Measure (lines, areas)
- Share Map
- Search
- Sync
- Directions
- Compass

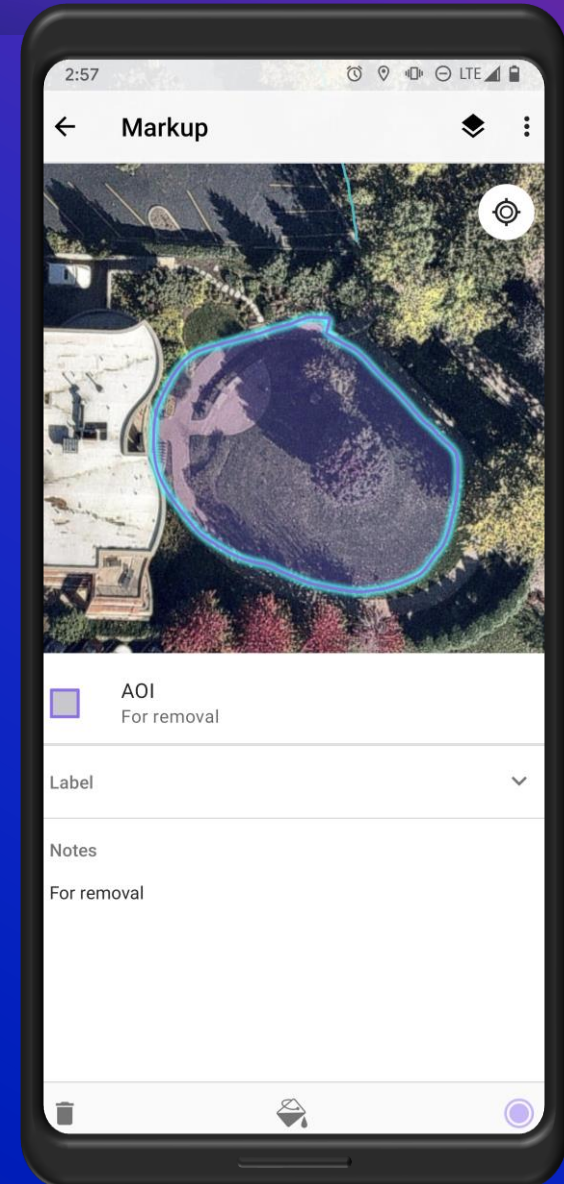

ArcGIS Field Maps | Map markup capabilities

Markup Tool

Markup Layers

Share Markup

- Place a marker
- Freehand sketch lines and areas
- Recognize shapes
- Move graphics

ArcGIS Field Maps | Map markup capabilities

Markup Tool

Markup Layers

Share Markup

- Markers, lines, arrows, areas
 - Choose color
 - Label and note attributes
- Save markup in one or more layers
- Turn markup layers on/off with Layers tool

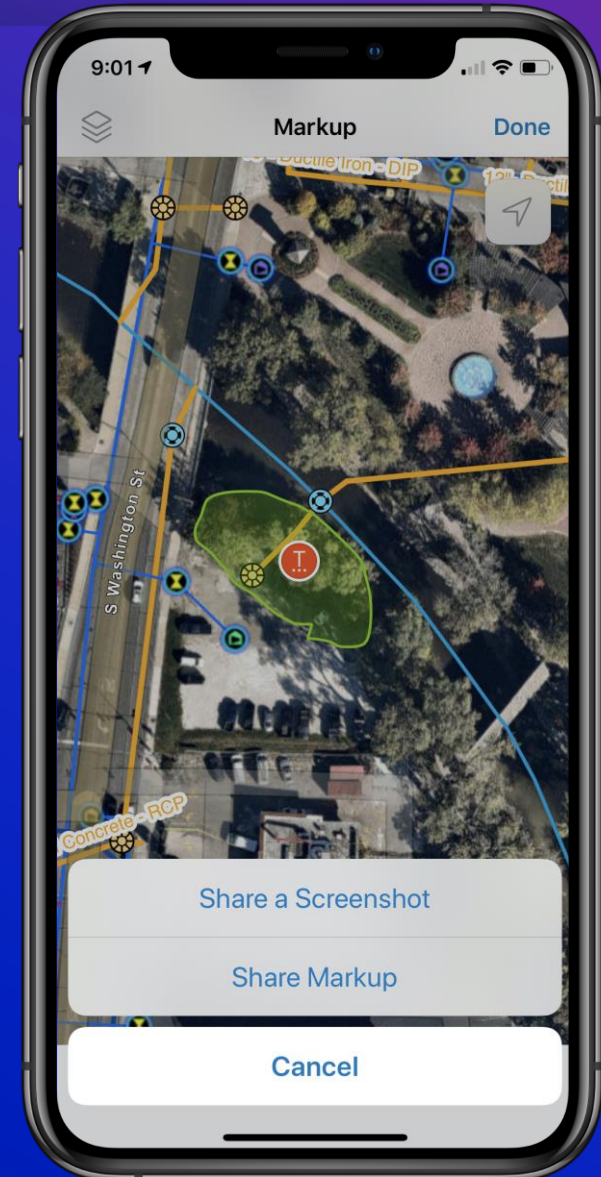

ArcGIS Field Maps | Map markup capabilities

Markup Tool

Markup Layers

Share Markup

- OTA, by email, text message
- ArcGIS organization
 - Requires publishing privileges

ArcGIS Field Maps | Data Collection – High Accuracy GPS/GNSS

- **Need better GPS accuracy**
 - 1 – 3 meters for above ground assets
 - > 1 foot for below ground assets
 - Cm accuracy for construction projects
- **Key GNSS Partners**
 - Dual, Garmin
 - Eos Positioning Systems, Geneq, Bad Elf
 - Juniper, Trimble, Leica
- **Different ergonomic solutions**
 - Pole mount
 - Backpack
 - 3D-printed attachments and more

ArcGIS Field Maps | Data Collection – High Accuracy GPS/GNSS

- **GPS Capture capabilities**

- Single Point/vertex capture (w/ Z-value)
- Streaming data capture (lines/areas)
- Averaging

- **Understanding Accuracy**

- GPS bar
- GPS metadata
- Required accuracy
- Confidence level

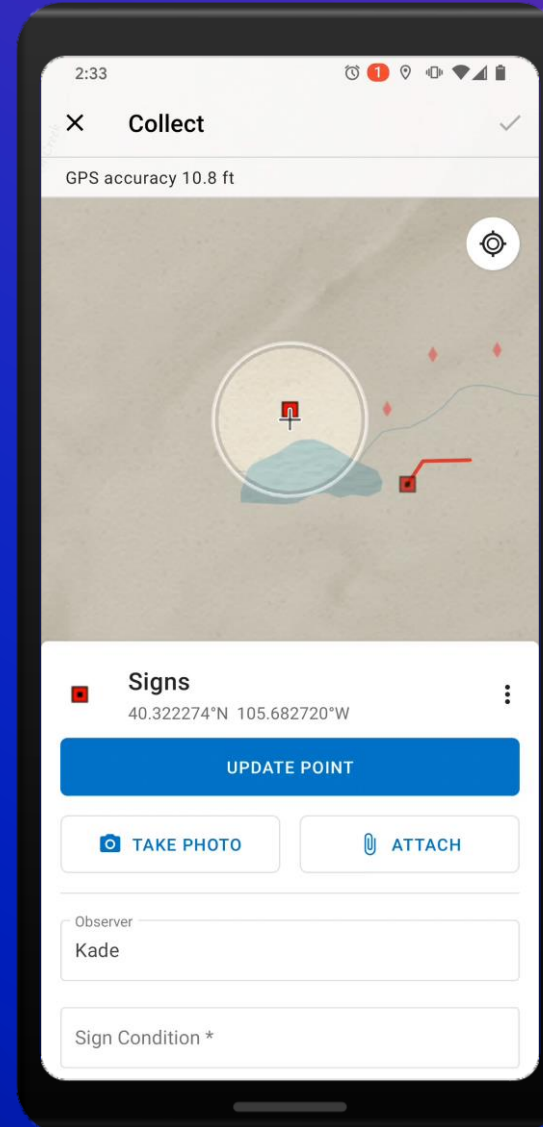

- **Connecting to Receiver**

- Location Provider
- Location Profile

Smart forms capability

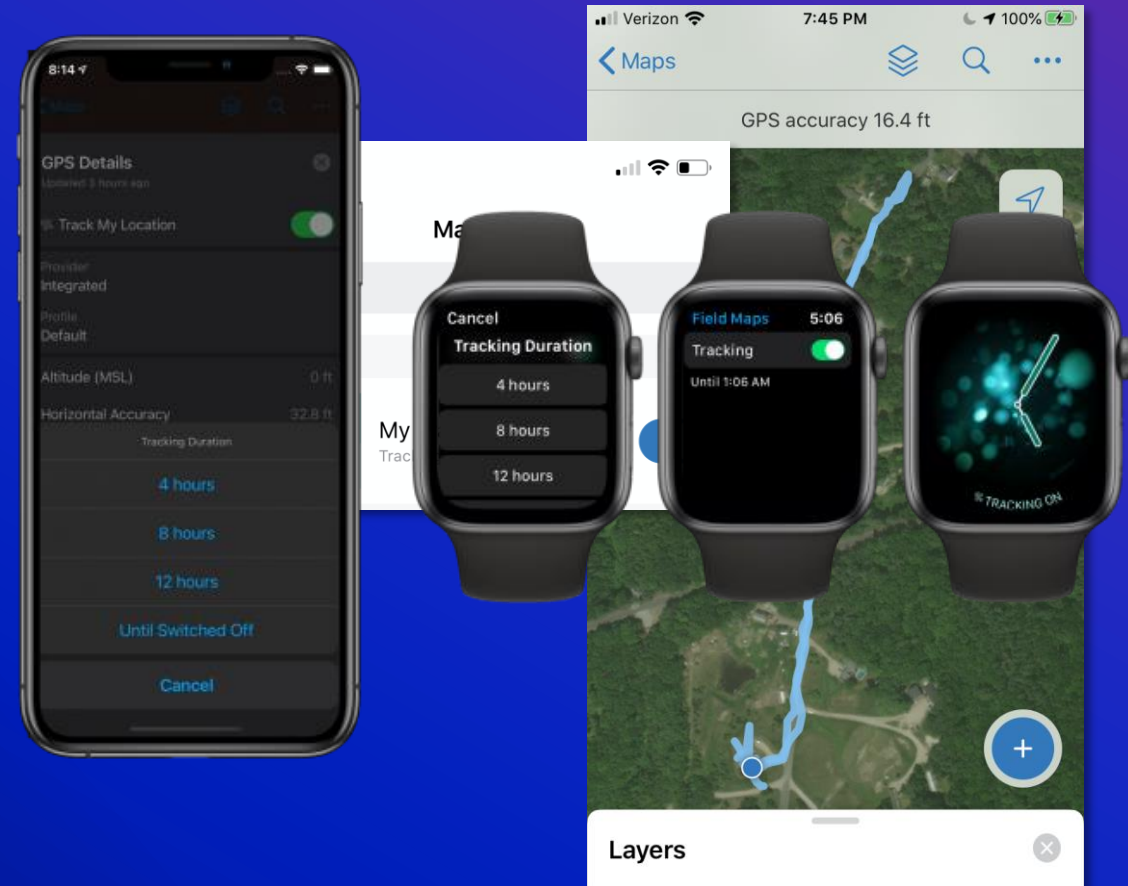

- Organize attributes
- Conditional visibility
- Pick lists
- Required fields

ArcGIS Field Maps | Location Tracking

- Supports Viewer user type + ArcGIS Tracker license
- **Battery savings** location tracking capability
 - Driven by activity
- Switch **tracking on/off**
- **View location tracks** in any map (iOS/Android)
 - Turn tracks layer on/off
 - Set track duration
- Supported on Apple Watch

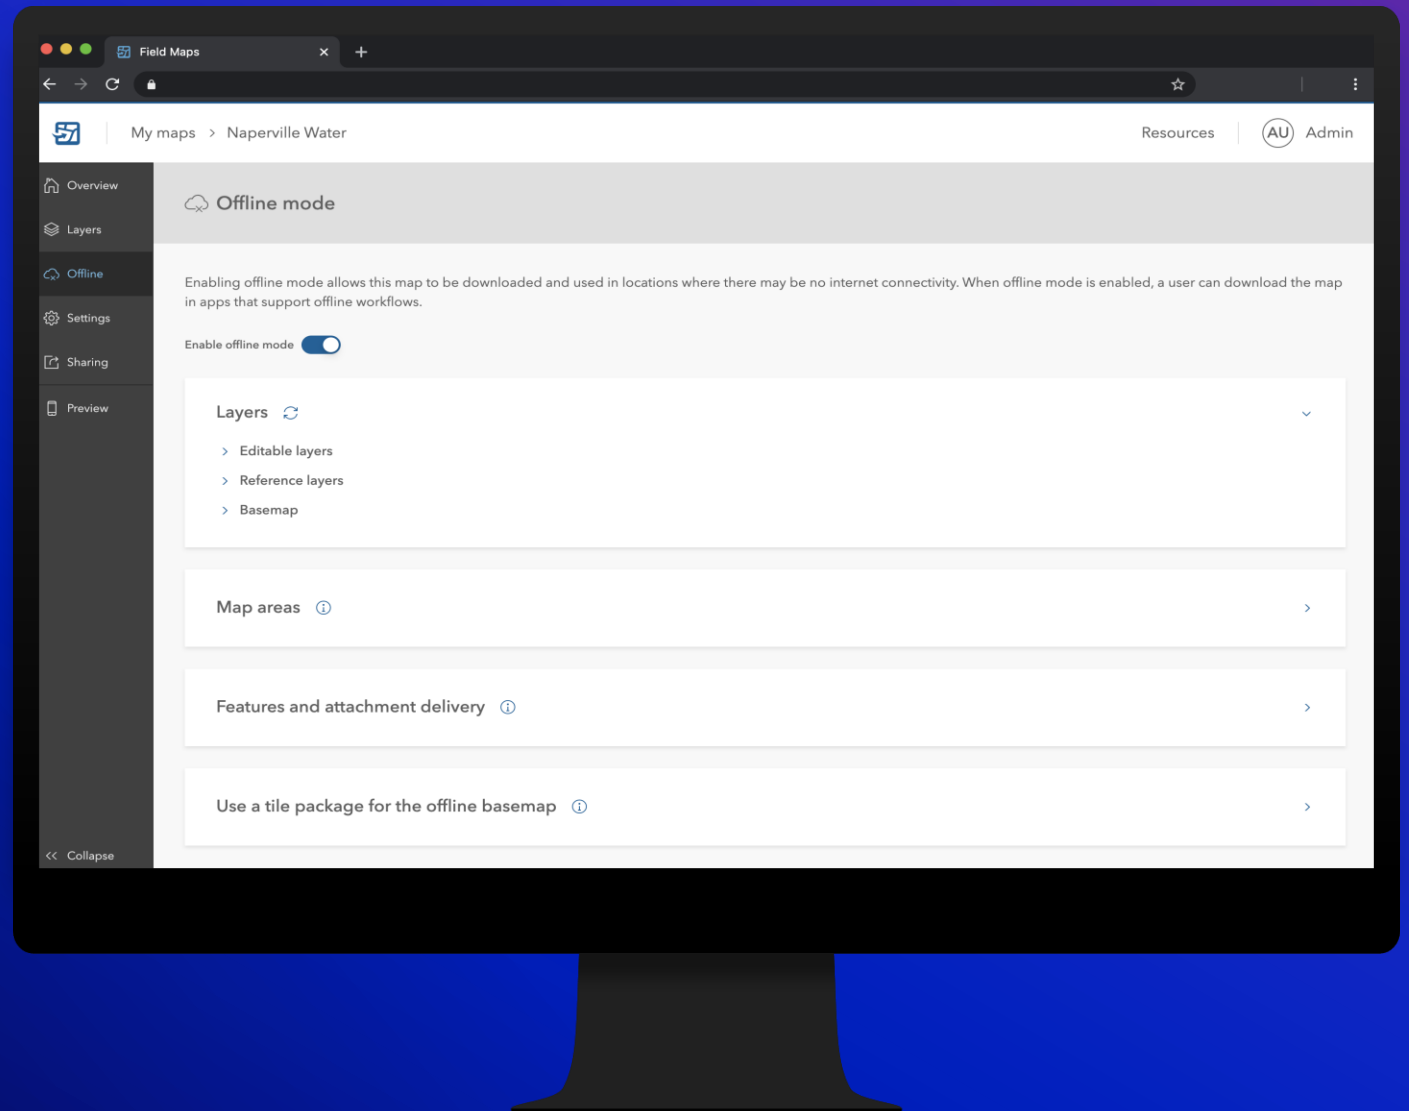

ArcGIS Field Maps | 5 key capabilities in one app

1. Map Viewing
2. Map Markup
3. Data Collection
4. Asset Inspection
5. Location Tracking

Demonstration

ArcGIS Field Maps

- 
- The background is a complex, abstract composition. It features a dark blue gradient on the right side, transitioning into a more vibrant blue and red on the left. On the left side, there are several overlapping geometric shapes, including a large, stylized map of Australia in blue and orange. There are also various curved lines, some in red and some in blue, and a pattern of small, dark blue dots in the lower right corner. The overall effect is a dynamic and modern digital design.
- Read-only map viewing
 - Markup
 - Tracking
 - Capture

- 
- Configure maps
 - Create smart forms
 - Configure offline
 - Share

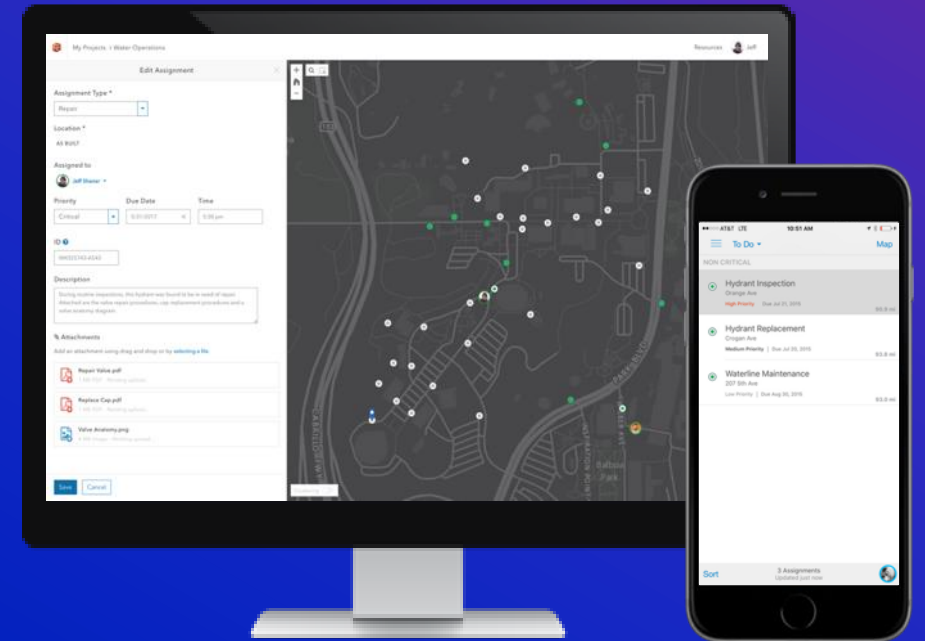

ArcGIS Field Maps | User types and licensing

If you have a...	In Field Maps, you can...
 Field Worker, Creator, or GIS Pro named user	Perform inspections, create or update your asset inventory, add photos/attachments, and simplify multi-app workflows
 Viewer named user	Achieve situational awareness workflows, view dynamic web maps, use offline maps, create markup
 ArcGIS Tracker premium app license	Enable location tracking workflows, report your location in real-time, record a 'breadcrumb' trail of your location history
 ArcGIS Collector app license	Create and edit GIS data from your mobile device with high accuracy, add attachments, work offline

Plan and **coordinate** field work

Use **location awareness** to improve efficiency

Receive & **manage** field assignments

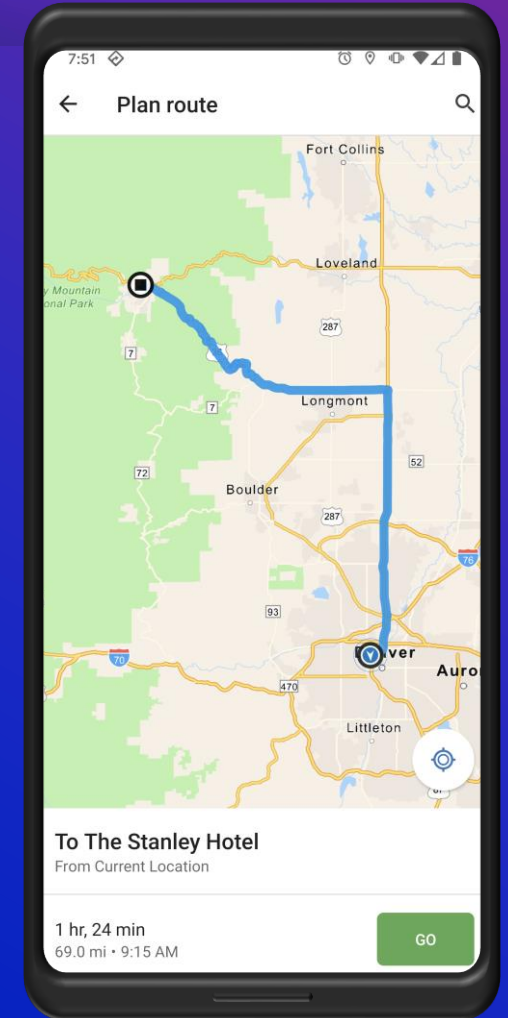

ArcGIS Navigator | Route your field workforce to where it needs to go

Find assets and navigate to them while **offline**

Use **your own** maps, asset inventory, and custom roads

Traverse **pre-planned routes** for maximum efficiency

ArcGIS QuickCapture

Field Operations

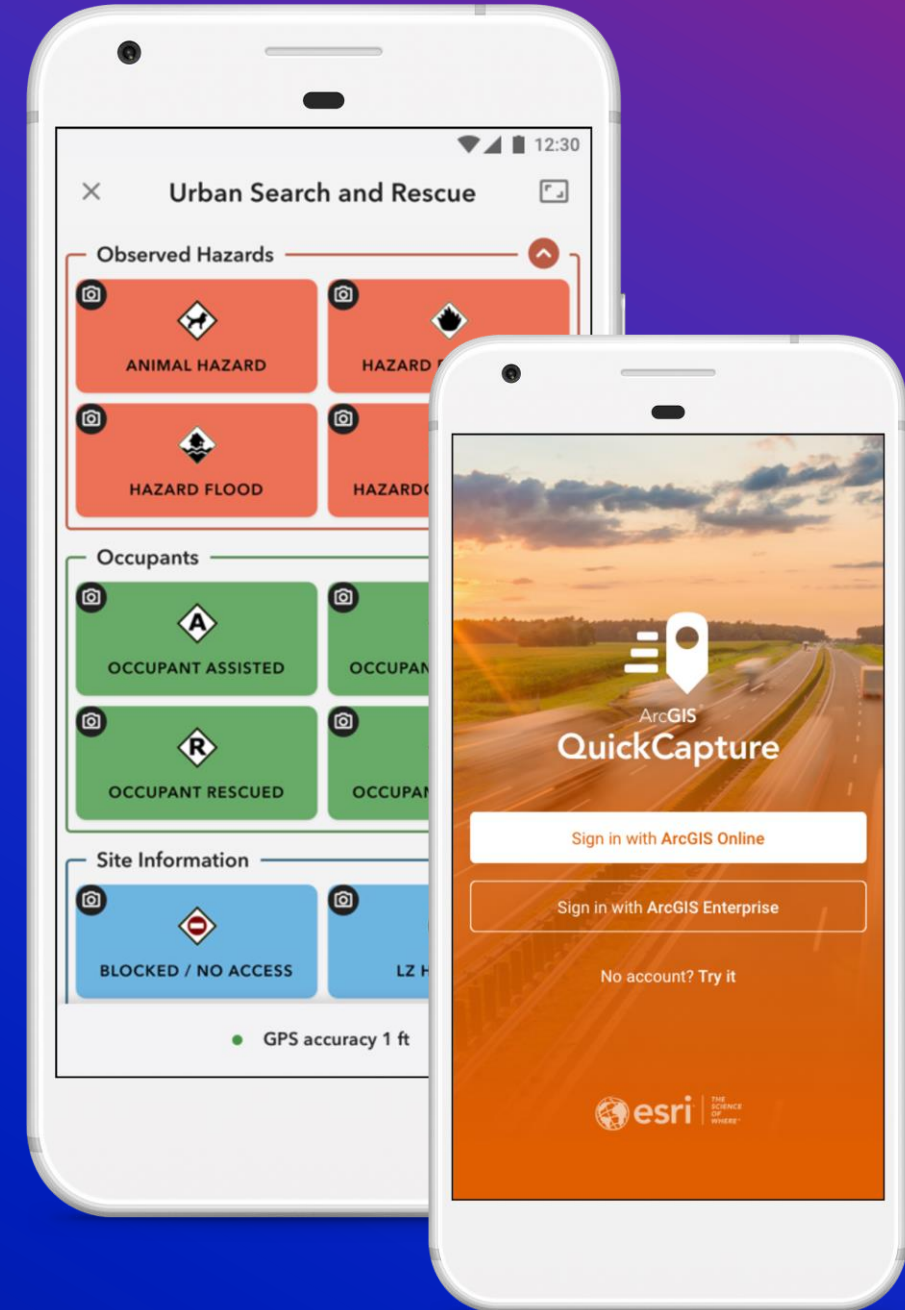

ArcGIS QuickCapture

The rapid data collection app

A “big button” mobile app

Simplest way to capture field observations

At-speed data collection workflows

Benefits of QuickCapture

Real time data transfer

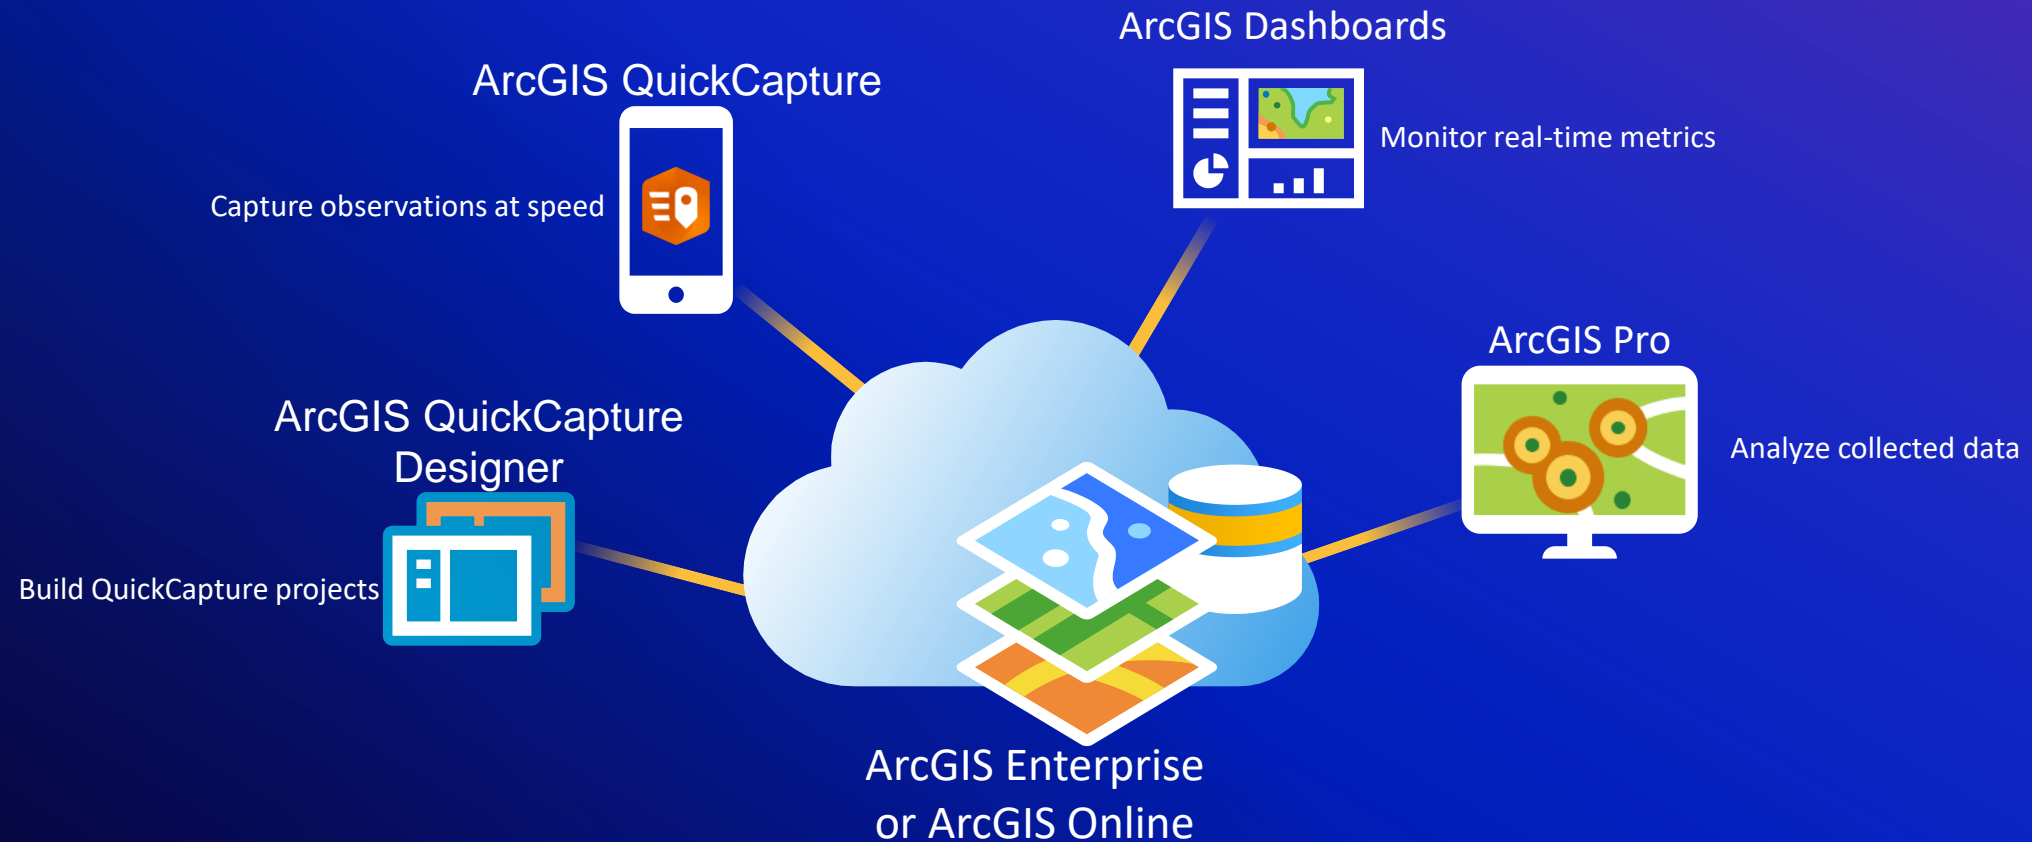

Reduce training costs

Increase efficiency

Reference Deployment

ArcGIS QuickCapture

ArcGIS QuickCapture designer

Configure your own big button apps

Configure your own big button apps

From your web browser

No-code

Device Variables

- Use them to automatically calculate GIS attributes when a feature is captured
 - Speed
 - Direction of travel
 - Time of capture
 - Etc.
- Over 40 variables

The screenshot displays the 'Bike Trails' application interface. The main form is titled 'Bike Trails' and includes a 'SHARE' button and a 'SAVE' button. The form is organized into sections: 'Points of Interest' (with buttons for Bridge, Intersection, and Lookout), 'Trails Paved' (with buttons for Advanced, Intermediate, and Beginner), and 'Trails Not Paved' (with buttons for Advanced, Intermediate, and Beginner). A sidebar on the right lists various device variables under the 'DATA' tab, including 'Button', 'Direction', 'HorizontalAccuracy', 'Altitude', 'Latitude', and 'Longitude'. Each variable has a corresponding 'Enter decimal' input field.

User Inputs

- **Update attributes on new features**
 - Enter input after button is pushed
 - Or when the project starts
- **Can be required or optional**
- **Supports data validation rules**

**Project
User Input**

**Button
User Input**

User Inputs

- **Update attributes on new features**
 - Enter input after button is pushed
 - Or when the project starts
- **Can be required or optional**

**Button
User Input**

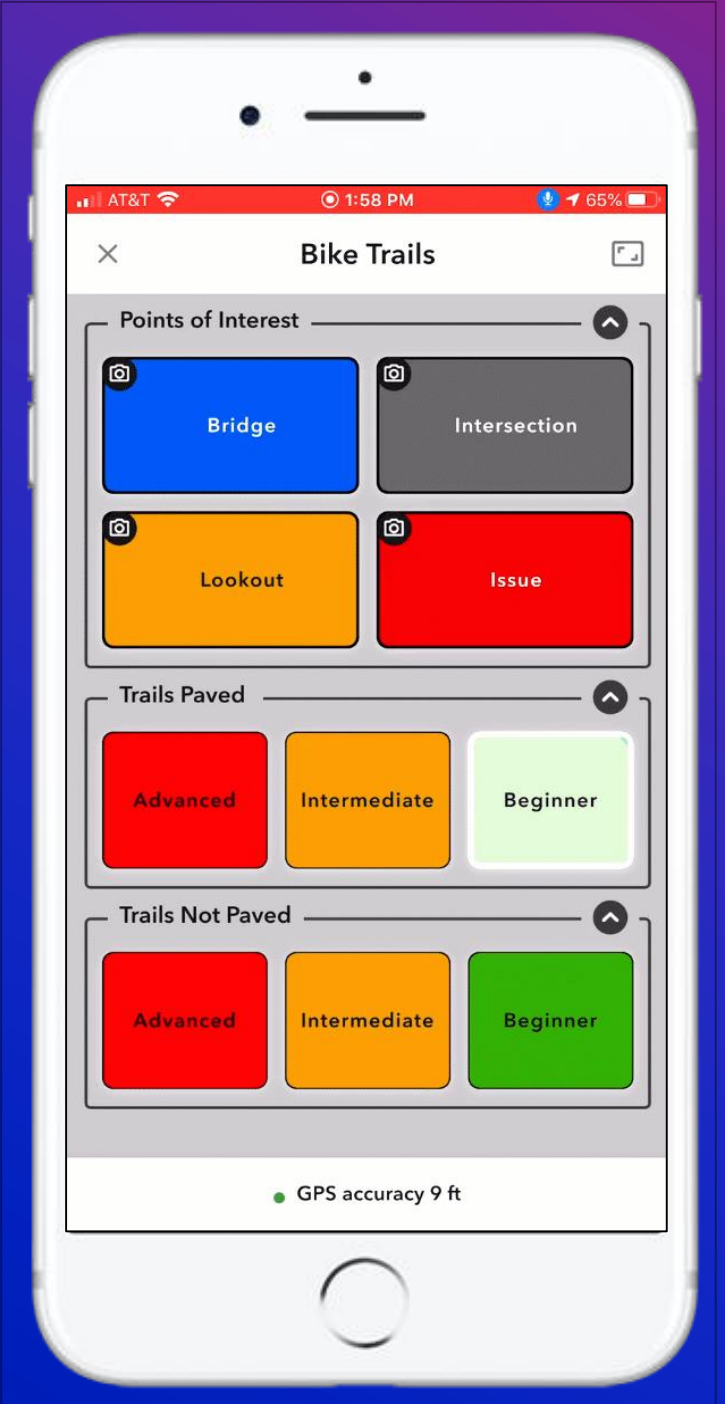

Nested Data Capture

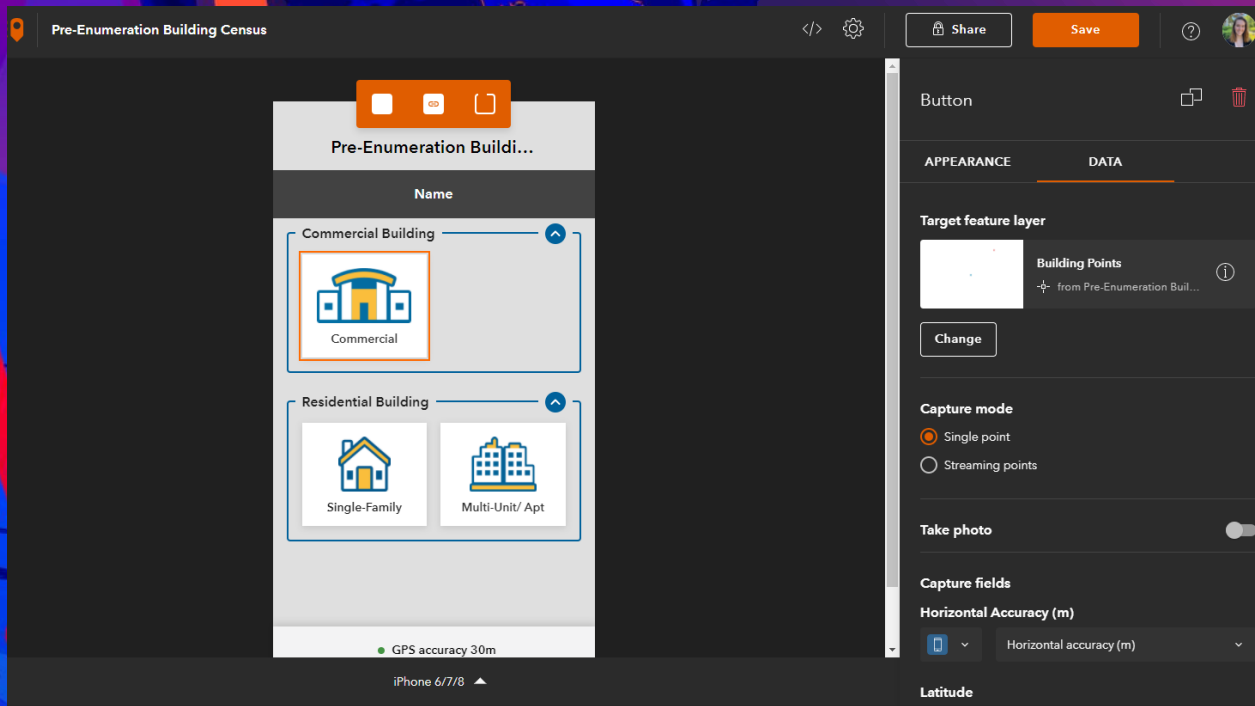

- QuickCapture supports capturing multiple observations at the same time:
 - Bike trail on the right side
 - Also on the left side
 - ...

Exclusive Groups

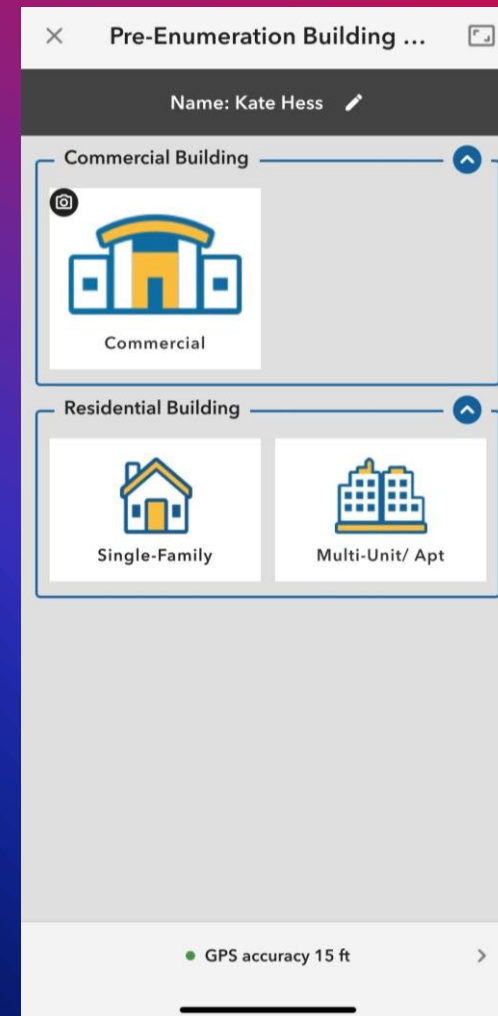

- You can also group buttons to capture information in a mutually exclusive manner:
 - Pavement condition good vs bad
 - Beginner trail vs intermediate

Web designer

2. Get answers

Collect data

Field app

Web app

3. Analyze results

Make decisions

Website

A complete form-centric system

Make forms smart!

- Boost data capture efficiency
- Data collected in the field is available in the office in real-time
- Reduce errors
- Prepopulate responses
- Guide the respondent through the form

The image displays two versions of a data collection form. On the left is a desktop web form titled 'Individual Assistance Field Collection Survey (Express)'. It includes a section for 'Incident Information' with a date field set to 6/10/2020, and a map section for 'Coordinates of the damage' showing a residential street with a blue location pin. On the right is a mobile app interface for 'Rapid Evaluation Safety Assessment'. It features a table for reporting building conditions with radio button inputs for Minor, Moderate, and Severe damage levels. The table is as follows:

	Minor / None	Moderate	Severe
Collapse	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Building leaning	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Structural damage	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Falling hazards	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Ground slope movement	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Below the table is a 'Comments' text area and an 'Estimated Building Damage' dropdown menu currently set to 'None'. A green checkmark button is at the bottom right of the mobile app screen.

Create a survey

- **Survey123 web designer**
 - Runs in web browser
 - Drag-and-drop visual form builder
 - Easy to get started

The screenshot displays the Survey123 web designer interface in 'Design' mode. The main workspace shows a form titled 'Census Interview Form' with three numbered sections:

- Section 1:** A text input field labeled 'Name*'. A small '1' is in the top left corner.
- Section 2:** A question 'What is (NAME)'s relationship to the head of household?' with ten radio button choices arranged in a grid: Head of Household, Spouse, Own Son/ Daughter, Step Son/ Daughter, Parent, Brother/ Sister, Nephew/ Niece, Son/ Daughter-in-Law, Grandchild, Parent-in-Law, Cousin, and Other Relative. An 'Unrelated' choice is at the bottom. A small '2' is in the top left corner.
- Section 3:** A question 'Is (NAME) Zambian?' with two radio button choices: Yes and No. A small '3' is in the top left corner.

The right sidebar contains configuration options for the selected question (Section 2):

- Single Choice:** Includes fields for 'Label' (What is (NAME)'s relationship to the head of househ) and 'Hint' (Tell user how to fill this question).
- Choices:** A list of the ten choices from the form, each with a plus/minus icon and a 'Batch Edit' button.

The top navigation bar includes tabs for Overview, Design (active), Collaborate, Analyze, Data, and Settings. The bottom status bar shows '3' questions and '6' controls.

Create a survey

- **Survey123 Connect**

- Desktop application used in combination with Microsoft Excel
- Define the content, look, and behavior of the smart form
- Maximum level of control over form design

The screenshot displays the ArcGIS Survey123 Connect desktop application. The title bar reads 'ArcGIS Survey123 Connect'. The interface features a green header with three tabs: 'Form Preview' (selected), 'Schema Preview', and 'Settings'. On the left is a green sidebar with icons and labels for 'XLSForm', 'Update', 'Files', 'Publish', 'Online', 'Sign in', and 'Help'. The main area shows a preview of a survey form on a tablet screen. The form is titled 'Zambia Population and Housing Census' and includes fields for 'Polygon' (with a map icon), 'Enumeration Area', 'Building ID', 'Zoning' (dropdown), 'Condition' (dropdown), 'Occupancy Type' (dropdown), 'Number of Floors', and 'Number of Housing Units *'. Below these is a section titled 'Population Survey' with a sub-section 'Housing Unit Questionnaire'. The bottom of the tablet screen shows a green bar with a checkmark. At the very bottom of the application window, it says 'Tablet Portrait Black' and 'Load time on Windows 1.3 seconds'.

Demo

Survey123 Web Designer

Share your survey

- **Private surveys**

- Shared with a well-known group of users (secured access)
- Requires one ArcGIS account per field user
- Can use editor tracking capabilities
- Ideal for sensitive data and for tracking survey submissions and edits

Share your survey

- **Public surveys**
 - Shared with everyone
 - No need for ArcGIS accounts – anyone can submit data
 - Ideal for crowdsourcing initiatives

XLSForm

Expanded support

Robust and proven specification for designing smart forms.

The conceptual foundation for the smart form capabilities in Survey123 and other smart form solutions in the market.

XLSForm common features:

- Rich set of question types
- Conditional visibility of questions and groups
- Multi-page surveys
- Grid layouts
- Multilingual surveys
- Filtered lists
- Calculations
- Constraints...

Inbox

Allows you to:

- Use a map and a list to explore existing data
- Model a to-do list (assignments) within the Survey123 app
- Navigate to existing assets or assignments

What's new:

- Use the Inbox to view and/or edit data
- Copy record from Inbox
- New search and barcode filter
- Direction and distance indicators
- Faster

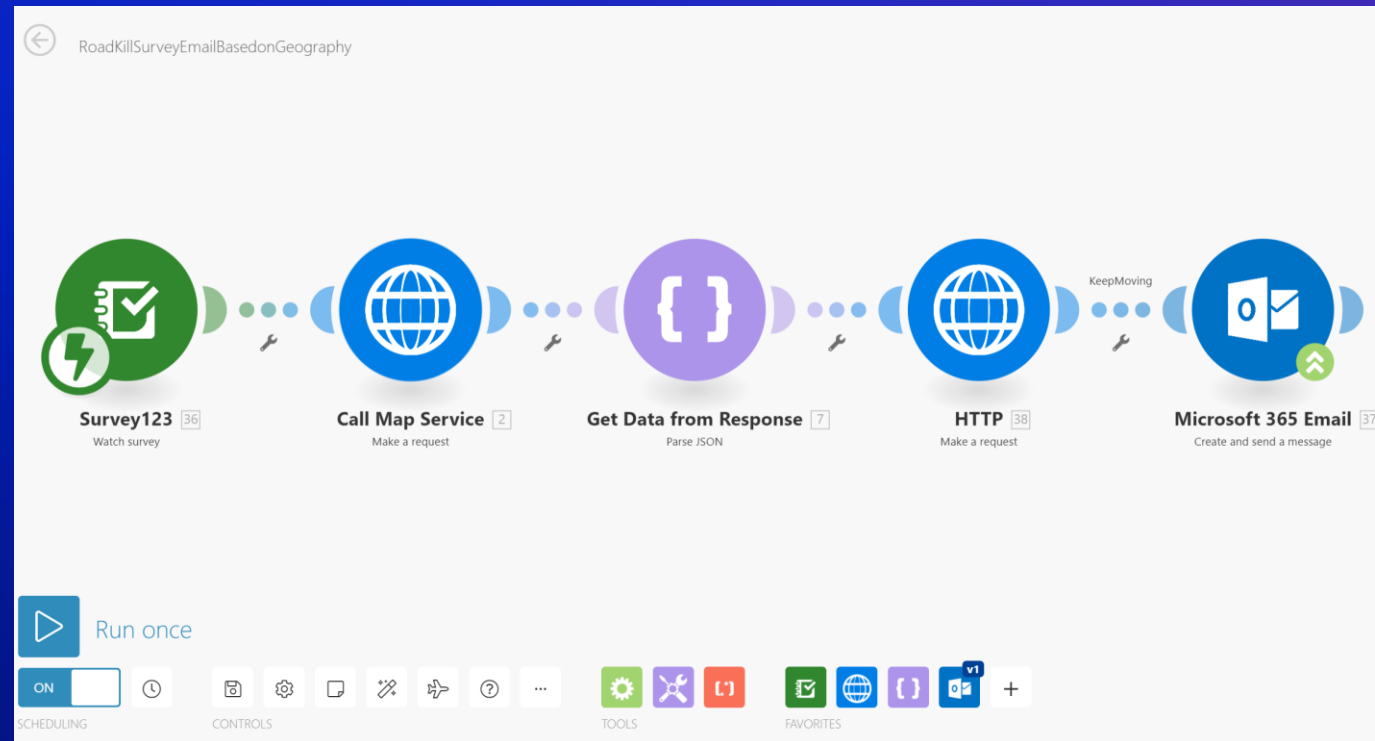

Webhooks

Allows you to:

- Integrate with other business applications at the time a survey is submitted
- e.g. Generate a report and send an email

Platforms:

- Integromat
- Microsoft Power Automate
- Zapier
- Others...

App Integration

Allows you to:

- Open one app from another app or web page
- e.g. Open a Survey123 survey and pass values from the Field Maps app
- Demo!

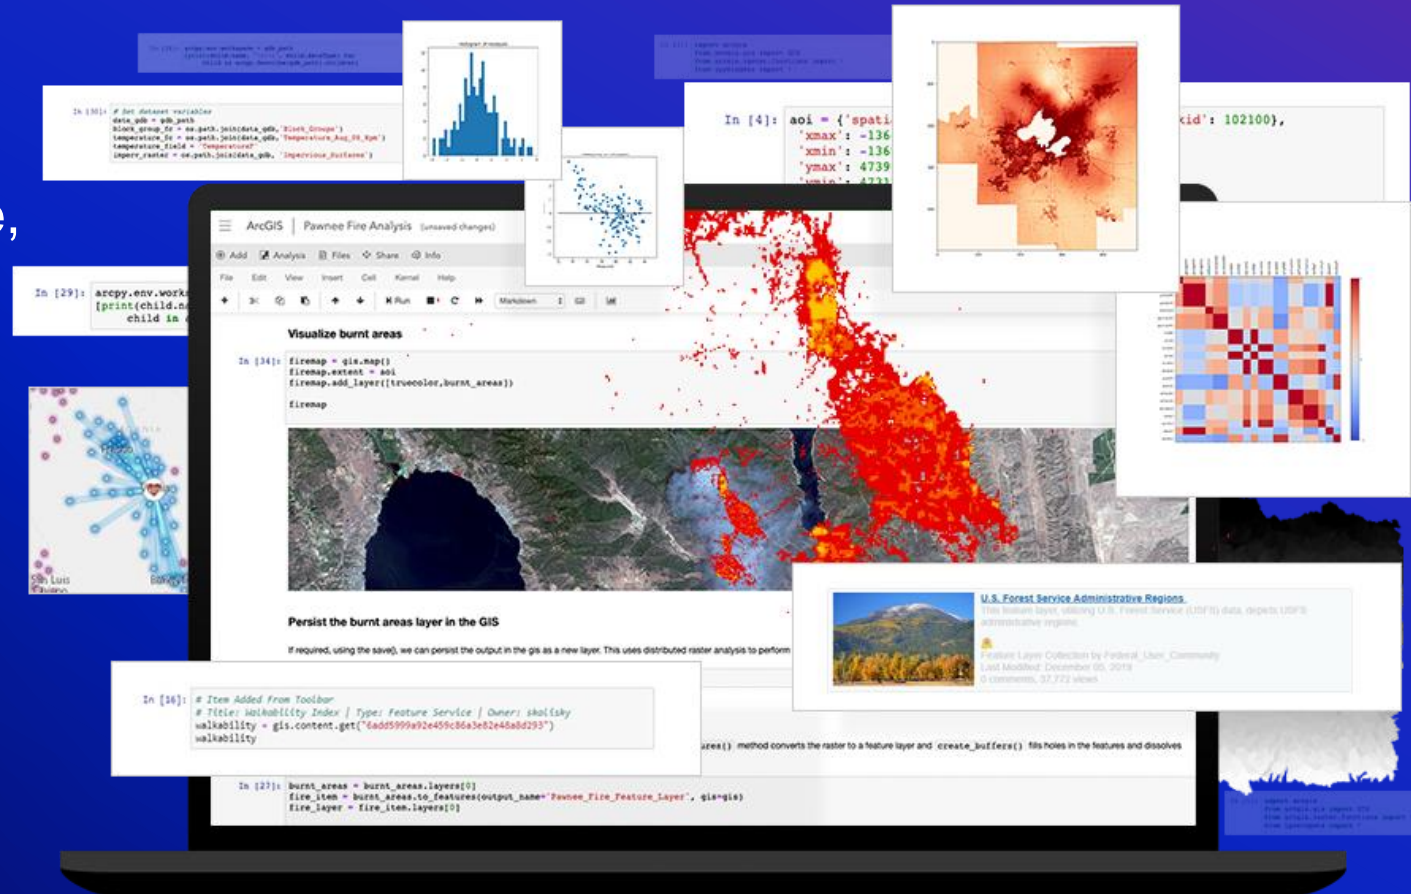

Field Operations

ArcGIS Notebooks

- Automate Analysis and administration
- Powerful data science platform
- Code with the Python API, ArcPy and many other python libraries
- Fully integrated within ArcGIS Online, Enterprise and ArcGIS Pro
 - Add and reference portal items from within your notebook
 - Share notebooks with other users within your portal
